

New Partnership for Patient Safety

Remedy'sRx Specialty Pharmacy Partners with Pharmapod Canada Ltd.

Remedy'sRx
Specialty Pharmacy

Remedy'sRx Specialty Pharmacy is pleased to announce a new partnership with Pharmapod Canada Ltd to deliver a centralized pharmacy portal service to drive improvements in patient safety.

Our implementation of the Pharmapod Global Learning Health System and medication incident reporting platform is the first in the Long Term Care, Retirement, Assisted Living and Group Home environment in Canada. Homes will be able to report and track medication related incidents, and Pharmacies will be able to report, analyze and trend incidents.

Remedy'sRx Specialty Pharmacy chose Pharmapod's service because it is an easy to access user-friendly, flexible and highly scalable platform that facilitates compliance with regulations and standards of practice.

Pharmapod's innovative analytical solution also provides the ability to track trends and study root causes with the overall goal to improve patient safety. This is especially important as Ministries of Health are placing increased scrutiny on the medication supply chain and related incidents.

Pharmapod's technology will make the process of managing medication incidents more efficient for our care home partners. Enhancing the quality and safety of medication use and administration is a key part of our PharmRx Medication Management System and SafeRx Compliance and Legislation programs.

The Pharmapod medication error reporting system is already playing a vital role in improving patient safety and supporting pharmacists across the globe in tracking and reducing medication errors. The Ontario College of Pharmacists has partnered with Pharmapod to implement their AIMS (Assurance and Improvement in Medication Safety) program across all Ontario community pharmacies.

Over time, this collaboration will also provide additional quality clinical and learning tools in a consolidated client portal which will only be available to clients of Remedy'sRx Specialty Pharmacy.
