

I am **Your** Partner **in Care** >

Enna's is a Remedy'sRx Specialty Pharmacy "Partner in Care". Her leadership style emulates Remedy'sRx "Partner in Care" philosophy that our customers value and appreciate. Our philosophy and leadership such as Enna's has resulted in Remedy'sRx having the highest retention rates in the industry.

Enna brings our clients her passion for building a culture that encourages and fosters strong relationships and connections. Her shared belief is that Healthcare leadership demands that all stakeholders have a unifying vision where resident and patient safety work is primacy. However, the reality is that the complexity of our business sometimes pulls us in often competing directions. It is for this reason that leaders need to be the first to model collaborative behaviours and ensure interdependency is nurtured between the different healthcare practitioners.

Enna articulates that empowerment through 'shared leadership' will ensure greater job satisfaction, allow us to be more responsive to ever changing conditions and ultimately serve those who we are charged to care for.

Her focus on coaching the pharmacists teams to become resilient leaders and to remember the core purpose of their work in patient care is central to Enna's leadership style. As a Positive Psychology practitioner, she empowers her teams to use their core strengths to achieve new heights. Creating team cohesion through a sense of purpose and celebrating successes elevates the benefits of Remedy'sRx "Partner in Care" philosophy to all our customers.
