## An Eye to the Future

Sally is a Clinical Lead Pharmacist in Ontario and a Remedy'sRx Specialty Pharmacy "Partner in Care". With over 30 years in long-term care under her belt, she provides clients with warm, highly personalized service. Because of pharmacists like Sally, our customers can be sure they are receiving the best care in the industry.

As a pharmacist working in the long-term care industry, Sally is most invested in growing and developing Remedy'sRx's greatest resource: our people. Sally puts her many years of experience to use in identifying the best and brightest in the industry. Her knowledge of what it takes to go above and beyond means that every one of our pharmacists provides our clients with exceptional service.

As a preceptor and co-op supervisor to students of the leading pharmacy programs in Canada, Sally plays an important role in welcoming the most proficient new pharmacists to Remedy'sRx. Central to this role is her unwavering support of their learning journey, where Sally encourages personal growth and the pursuit of additional certifications.

Sally believes all pharmacists should devote themselves to continuous development. This is especially true when it comes to key skills such as caring for seniors and understanding medication systems in long-term care. She instills this value in all her students and finds it extremely rewarding to see them succeed.

In 2018, Sally was presented with the University of Waterloo's Co-op Supervisor of the Year Award after being nominated by her co-op student. She is now proud to call that student her colleague, as he provides exceptional clinical pharmacy services with Remedy'sRx in Central Southern Ontario.

With her eye to the future of long-term care pharmacy, Sally is ensuring a bright outlook for all Remedy'sRx Specialty Pharmacy clients. As your Partner in Care, you can trust Sally - and Remedy'sRx - to have your future in mind.
